MyWSU - How to Access Third Party Information with a Friend ID (FID)

MyWSU: How to Access Third Party Information with a Friend ID (FID)

Directions on accessing third party information in MyWSU with a Friend ID. If you are a Parent or a Friend of a student, you will need to use your Friend ID (FID) to access the student’s information. A Friend ID or FID is an account based on your personal email address that has been granted third party access by the student.

1. Open a web browser and go to my.wsu.edu
2. Click on Third Party Access Tile > then Access Student Shared Information.
3. Next you should see a small link that says "View Info" next to your student’s name*

*If you been granted access for multiple accounts, they will all show up on this page

Please note that if you have more than one student going to WSU, you will need to be granted access for each student separately, but you can use the same Friend ID for multiple students.
