Security Key Options for Extra Verification

Background

- One of the options for Extra Verification is the use of a Security Key.

Issue/Problem

- Students who cannot or do not wish to use Text Message, Voice Call, Okta App, or Google Authenticator on a phone or tablet for Extra Verification, are able to purchase and use a USB Security Key to obtain the necessary code for Extra Verification.
- For WSU Staff and Faculty who cannot or do not wish to use Text Message, Voice Call, Okta App, or Google Authenticator on a phone or tablet for Extra Verification, they may buy their own Security Key, or contact their department regarding purchasing a Security Key for the user's Extra Verification needs. Whether the department will purchase the item is solely up to each individual department.

Solution

- For Usage, see “How to Set Up Extra Verification” for direct instructions on setting up Security Keys for [How to Set Up Extra Verification](#).
- ITS has purchased and tested the following options, but does not recommend any specific product, nor can they support them directly. When purchasing a key, look for “FIDO Certified” or the logo:
