

# Zoom - How to set Screen Share to Host Only

## Issue:

I want to prevent other participants in my Zoom meeting from being able to share their screen.

## Resolution:

There are two methods to restrict who can screen share.

The first is set via a user's Zoom profile which applies to ALL meetings hosted by that user while the setting is toggled on.

1. Visit <https://wsu.zoom.us/> To Sign In
2. Once Authenticated, go to your Settings Tab
3. Under Screen Sharing, change "Who Can Share?" to **Host Only**

4. Select Save to finalize the change

The second method is for the **Host of the meeting** to use the **in-meeting controls** to set who can screen share. This method can be used to allow others to share their screens if the above method is set on the Zoom user profile.

**NOTE** You will need to make sure you have the most **up to date Zoom Client** for all Host controls to be available. Instructions on how to update your client: <https://support.zoom.us/hc/en-us/articles/201362233-Where-Do-I-Download-The-Latest-Version->

1. **If you have an older version of the client - 4.6.9 or older - use the following instructions**
  - a. Once in a meeting, the Host can click on the Up button to the right of the green Share Screen button to get the screen share options window.
  - b. Select Advanced Sharing Options.

c. Select **Only Host** and exit the options window.

2. If you have the latest version of the client - 4.6.10 - these controls have moved to the 'Security' button

a. Click on the **'Security'** button and uncheck **'Screen Share'**
