

WordPress - How Do I Link My Labs Site to My Directory Page

Wordpress: How Do I Link My Labs Site to My Directory Page?

A quick tutorial on how to link labs sites from your directory page

1. Go to **directory.vancouver.wsu.edu**
2. On the left side of the page, choose the option for **Request a directory change**
3. At the bottom of the page you will see an option to add in a link for your Research page, which is also your Labs Site.
4. Click the **submit** button at the bottom
5. Your request will be sent to an admin who will contact if you they have any questions about your request. They will also tell you when your request is done.
