Issues Having to MFA Multiple Times Throughout Different Programs

**Issue:**
User is having to verify with their Extra Verification option multiple times for O365 products.

**Solution:**
Open only one program that utilizes Extra Verification at a time (For Example Teams). Please ensure all other O365 programs are closed. Once you are done verifying through Extra Verification on the one program, you may open the rest of the programs that utilize Extra Verification. In doing so, your verification token will be valid for all programs for the session.
