WiFi – Connecting a Mac OSX Computer to WSU Wireless

On the top right of your desktop you should have a wireless icon for your Airport Wireless Adapter. Click on the wireless icon and choose WSU Wireless from the listed available wireless networks. (If your Airport is turned off, you may have to select to turn it ON first.)

Once you select WSU Wireless, a box should appear asking for a Username and Password. Use your Network ID and Password, the same credentials you use to login to MyWSU, and click the “Join” button. (If you have a Friend ID instead that has been sponsored for Wireless Access, you can use that to login also.)

Once you are connected, if you click on the wireless icon again, you should see a Checkmark next to WSU Wireless. You are now online.
