Connecting an iPhone to WSU Wireless

Issue:
I do not know how to connect my iPhone to the WSU Wireless Network.

Solution:
- Click on the Settings icon in your device.
- Under Wi-Fi, click on WSU Wireless.
- For “Username” enter your Network ID and the password will be your regular WSU password.
- Click “Join”.
- Select “Trust” for the Certificate.

Once that has been completed you should now be connected to the WSU Wireless Network.
