Printing: Wireless printing for faculty and staff

To print to a departmental printer wirelessly, you'll need to:

1. Have the printer listed in your list of printers and
2. Make sure you're connected to the WSU Wireless network rather than the WSU Guest network

If you were able to print wirelessly in the past and now are unable to do so, the most common reason is that you've accidentally connected to the guest network rather than WSU Wireless. Be sure to check that before pursuing further troubleshooting.

If you you are still having problems or need us to add a printer for you, contact us – email: van.evita@wsu.edu , phone: 360-546-9770 , Helpdesk: VCLS 225
