

Wireless at WSU Pullman

There are five main wireless networks on the Pullman campus.

The Networks are as follows:

WSU Wireless- this is the primary wireless network for all of campus, login using your WSU NID and password or sponsored FID and password

WSU Guest- the guest network is for visitors on campus, Starting 02/15/2019 WSU Guest Users will Register themselves using the new Clear Pass Authentications steps listed here: [WiFi - WSU Guest Wireless Using ClearPass Authentication](#)

WSU Resnet- this is the primary network for WSU residence halls, login using your WSU NID and password

WSU Guest Resnet- this is the unsecured residential network for students to use for connecting devices such as Roku, Apple TVs, Playstation, etc. In order to connect to this network the device's MAC address has to be registered at the following site: wireless.housing.wsu.edu/guest

Eduroam- This network allows traveling students, faculty, staff, researchers of an organization/university to login as a 'guest' with an eduroam name/pw without having to request a visiting wireless guest account
